Quality Standards for After School Programmes TOOLKIT

What are Quality Standards?

The idea of 'standards' as a common set of measures or rules to describe and assess quality in human activities and occupations has been around for centuries. In the modern world, trade and industry boards or professional bodies oversee standards in industries, occupations and professions.

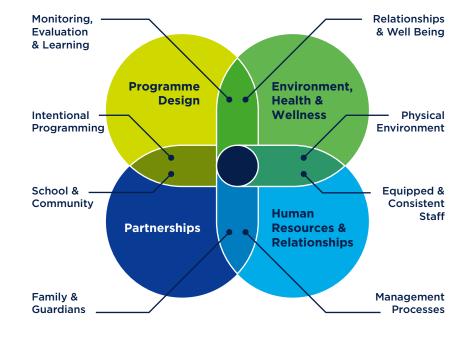

Standards can be used in many different ways: for example, to assess best practice in an industry or business, to get agreement on levels at which the performance of an individual or group can be pegged, or to set benchmarks for product quality.

In our context, the Quality Standards for After School Programmes (ASPs) give guidance to those working in this field. The aim is to help ASP providers, of whatever type, to work towards best practice, so that learners receive the best possible support, experiences, and outcomes. Standards can also be used to help the sector as a whole advocate for this kind of work, increase funding and build networks as ASP providers learn from each other through using common benchmarks.

How were the ASP Quality Standards and the Quality Assessment Tool developed?

The Learning Trust collaborated with several ASPs, and sought input from the sector at large, to develop the ASP Quality Standards and Quality Assessment Tool (QAT) for the afterschool sector.

This knowledge sharing identified several inter-related factors that shape quality in ASPs, as shown here. This informed the Quality Dimensions and the development of the Standards.

Who are the Standards and the QAT for?

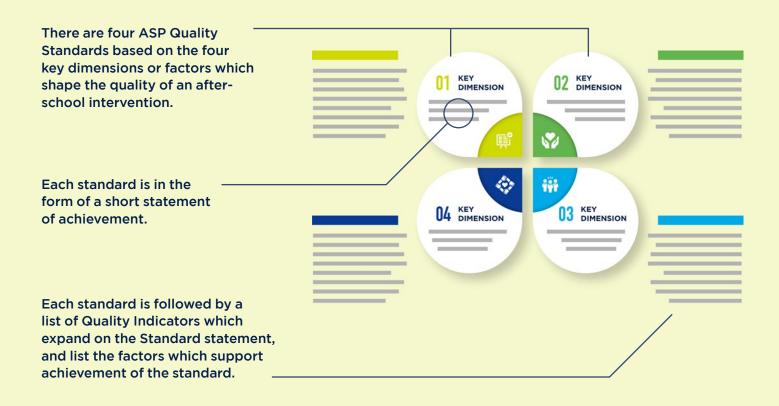

The Standards and the QAT have been developed with both in-school and out-of-school ASPs in mind and do not distinguish between pillar focus areas, that is, Academic, Sports & Recreation, Creative Arts, and Life Skills.

The Standards and the QAT can be used by anyone, from those just starting out with a programme to those who are opening new centres and introducing new programmes to their established organisations. The best way to use this document is in collaboration with your whole organisation. It can be discussed in a meeting or workshopped over the course of a few days, weeks or months.

The Standards and the QAT should be seen as living documents which can be adapted and reviewed by those who work in the field.

Note that the Standards and indicators are designed to apply specifically to the ASPs themselves, and not to your organisation as a whole.

What are the After School Programme (ASP) Standards?

Quality Standards for After School Programmes

QUALITY INDICATORS:

- Holistic development activities meet the emotional and academic needs of learners, according to best practice in the field.
- The programme is designed to be developmental in that it builds progressively on learners' achievements.
- Programme objectives and outcomes are clearly stated and there are measurable programme goals.
- Programme goals, expectations and commitments are shared with learners, staff and volunteers.
- The programme structure, schedules and time frames are clearly set out and explained.
- Materials and other resources are relevant and sufficient.
- The programme is run according to budget and sound financial management practices.
- There is a monitoring system in place to track enrolment, attendance and throughput.
- Attendance figures consistently reach an agreed-upon minimum per term.
- Appropriate tools and templates are used to collect and analyse data and record feedback from learners, staff and volunteers.
- Data is used to improve programme design and implementation (e.g. staffing, equipment and resources).
- Monitoring and data collection system follows POPI Act regulations for data protection and Department of Basic Education regulations with regard to learners.

QUALITY INDICATORS:

- Strategies for strong relationships between the ASP and the school include scheduled meetings with principals and/or the school management team (including the SGB).
- The programme involves the relevant teachers, either directly or through keeping them informed about learner progress.
- There is clear and regular communication to keep families informed about the programme (goals, benefits, costs, code of conduct etc.) and involved with their children's participation and progress.
- Families are equipped to assist learners with play, homework, and career guidance at home.
- Families give feedback on the programme.
- The programme involves the wider community in events or as volunteers.
- The programme networks with similar initiatives to share data and practices.
- The programme reaches out to local donors for funding and/or resources.

PROGRAMME DESIGN

The ASP is well-planned and effectively implemented and monitored, with clear objectives based on a needs analysis.

ENVIRONMENT, **HEALTH & WELLNESS**

The ASP provides a physically safe environment and an emotionally nurturing context that builds confidence and self-esteem, with processes in place to respond to learners' physical and emotional support needs.

PARTNERSHIPS

The ASP has strong relationships with the school, with the families of enrolled learners, and with the wider community, ensuring that these stakeholders know what the programme does, how it does it and why it does it, and sharing resources where feasible.

HUMAN **RESOURCES &** RELATIONSHIPS

The ASP has criteria, policies and procedures in place to appoint and manage responsive and motivated staff and volunteers, and to provide sufficient support to run the programme to a high standard.

4

QUALITY INDICATORS:

- Policies and procedures are in place for learner safety, and for a referral system or in-house service when physical or emotional support needs are identified.
 - The programme site is physically safe, secured and supervised.
 - The site complies with safety regulations such as access to first aid equipment.
 - There are adequate toilet facilities and access to water.
 - Physical equipment and other programme resources are safe and well-maintained.
 - The programme supports an inclusive and nurturing psychological environment in which learners feel welcome and belong.
- Learners are recognised and acknowledged, and have space to explore their interests and work towards goals.

QUALITY INDICATORS:

- Policies and procedures (including roles, responsibilities and remuneration) are clearly set out and explained to staff and volunteers.
 - Staff and volunteers are given orientation and training as relevant to the programme.
 - Staff and volunteers reflect the diversity and culture of the community.
 - Staff and volunteers are clearly identifiable during programme hours.
- Staff and volunteer performance (including consistent engagement and positive relationships with learners) is monitored and feedback is given.
 - Staff and volunteers give feedback to improve the programme.
- The practitioner-to-learner ratio is manageable and appropriate for the context and type of programme, and allows for high-quality engagements.

What is the Quality Assessment Tool?

This Tool gives guidance on how to assess your programme in relation to Quality Standards. The scoring template guides you in relation to how you are doing against the quality indicators. We also suggest hands-on activities regarding adaptations and improvements towards the achievement of the Standards. The QAT highlights some of the common challenges experienced by ASPs, and gives practical strategies gathered from the field to support programme development.

The QAT structure

Quality Dimensions: QD 1: PROGRAMME DESIGN QD 2: ENVIRONMENT, HEALTH & WELLNESS QD 3: HUMAN RESOURCES & RELATIONSHIPS QD 4: PARTNERSHIPS

For each Dimension you will find the following:

THE QUALITYThe Standard statement in the form of an overall description of what quality looks**STANDARD**like in each dimension.

REFLECTION QUESTIONS Each set of Reflection Questions given for each Standard speak to some of the Quality Indicators, but they are not intended to check rigid compliance. They should be seen as prompts for discussion and review of your ASP, to help you identify where you are doing well and where you could do better. Scoring 1 (Not Met) should not discourage you, as this means you are engaged in understanding problem areas and working towards improvements.

SELF-RATING SCALE

TING You can score yourself from 1 to 4, or indicate that you do not know or it is not applicable. You can do your rating on the basis of organisational discussions guided by the Reflection questions. Reflections lead to statements such as...

EXCEEDS - "We are a leader in this."

3 (√ 2

MEETS - "We demonstrate this in visible ways."

) **NEARING** -"We aren't quite there and could do with some support."

NOT MET - "We don't meet this standard indicator and need help doing so."

NOT APPLICABLE - "This doesn't relate to our programme."

TAKE ACTION!

This section can help you move from reflection and assessment into action. Scores 1 and 2 help you identify the key areas in which you don't meet the Quality indicators. You can then think about how to improve in these areas, and decide which ones take priority. Use the scores for planning - remember that you don't have to improve everything all at once. Consider what it is that your organisation can do to improve the quality of your ASP right now, this year, and next year.

REFLECTION QUESTIONS	SCORE	WHAT ACTION WILL WE TAKE TO CLOSE THE GAP?	WHEN WILL WE DO THIS?
Do we have a clear written mission/goal statement for each of our programmes?	4 0 3 0 2 0 1 0 N/A	Map out all our programmes and create a mission statement for each. Use a co-creation process with staff/ volunteers/learner representatives.	During Strategy session
Are our programmes based on research and updated according to good practice emerging from the sector?	4 0 3 0 2 0 1 2 N/A 0	 Conduct research on ASP models and practice - ask an intern to work on this and present at strategy session in October. Attend TLT events and start engaging more with the ASP network. 	Attend next Community of Practice meeting During Strategy session

We also share some examples of good practice and case studies to help you think about your improvement plans. Any improvement plan must consider the socioeconomic reality you face and be mindful of available resources, including money, staff, skills, and time. You also need to consider culture, relationships and context when applying improvement strategies.

N.B. You don't have to work everything out yourself! Reach out to other ASPs to collaborate and leverage know-how.

Using the QAT Tool

STEP 1: Gather your team together and work through the reflection questions

STEP 2: Discuss and agree on a rating for each question

STEP 3: Identify the areas where you scored 3 (Meets) or a 4 (Exceeds) and celebrate your wins!

STEP 4: Identify the areas where you scored a 1 (Not Met) or a 2 (Nearing)

STEP 5: Discuss which of these indicators are most important to the organisation's mission/vision.

STEP 6: For each of these priority indicators discuss what action you will take to close the gap. Ask your team to brainstorm ideas and then select and note down achievable actions.

STEP 7: Decide as a team when you can realistically do this. Consider what needs to be done immediately, what could be done later in the year, and what you could pick up next year. **STEP 8:** Review your next steps and assign responsibilities to move towards your actions.

Please don't feel tied to this format. The important thing is to find time with your team to reflect and think about how you want to improve your programme to meet certain indicators towards the standard. Be clear on how you will work together to close the gap, and to prioritise actions.
